Solar & accessory selection

Planning reference / not an installation manual or binding policy

01 / Confirm panel type, nameplate data, dimensions and mounting method.

02 / Match voltage, current, connectors, polarity and cable ratings to the receiving equipment.

03 / Check controller or charger input limits and supported battery chemistry.

04 / Assess shading, orientation, temperature and weather exposure.

05 / Request the final datasheet, compatibility list and installation instructions.

This checklist does not establish product performance, compliance, supply or warranty commitments. Confirm exact-model parameters and contract terms in writing. Installation requires qualified professionals, the approved manual and local requirements.
